MELA SEVA

Smart Event Management Platform

Geo-Tagged Asset Management • QR-Based Complaint System • GIS Smart Navigation

A comprehensive digital solution for large-scale public events & temporary infrastructure

Why Mela Management Needs Digital Transformation

Large-scale events manage thousands of temporary electrical assets, serve lakhs of visitors daily, and require 24×7 monitoring — yet most operations still rely on manual processes.

& p Current Pain Points

- No digital record of temporary assets (poles, wires, substations)
- Complaints reported verbally — no tracking or accountability
- No real-time visibility into complaint resolution status
- Citizens struggle to locate nearest hospitals, police, toilets
- SLA breaches go unnoticed until major escalation
- No data for post-event analysis & improvement

5000+

Temporary Poles per Mela

10L+

Daily Visitors

OUR SOLUTION

Mela Seva — Complete Digital Platform

A unified, scalable platform connecting citizens, field staff, control room, and administration through QR codes, GIS mapping, and real-time communication.

KEY FEATURES

Comprehensive Feature Suite

1

GIS-Based Asset Survey

GPS-tagged mapping of every pole, wire, substation with photographs

2

QR Code on Every Asset

Unique weatherproof QR stickers with pole#, road, sector info

3

Public Complaint Registration

Citizens scan QR !' auto-fill location !' submit complaint in 30 sec

4

Real-Time Control Room

Live dashboard with complaint feed, GIS map, instant assignment

5

Smart Navigation Map

Find hospitals, police, toilets, parking, ghats, shelters — nearby

6

SLA & Auto-Escalation

Timer-based SLA with automatic warning and escalation workflow

7

SMS Notifications

Automatic SMS at each stage — registration, assignment, resolution

8

Field Officer Mobile App

Offline-capable app with GPS, camera, complaint resolution

9

MIS & Reporting

Department-wise, officer-wise reports with Excel/PDF export

10

Multi-Event Scalable

Same platform for Kumbh, Mela, fair — configurable per event

11

Multilingual Support

English, Hindi, Marathi — all UI, SMS templates, and reports

12

Complete Audit Trail

Every action logged — who did what, when, from where

End-to-End QR Code Lifecycle

1

GIS Survey

Surveyor captures GPS, photo of each pole

2

Generate QR

System generates unique QR linked to asset & GPS

3

Print Labels

Weatherproof stickers with QR, pole#, road, sector

4

Apply to Pole

Sticker applied at 5-6 ft height — visible & scannable

5

Citizen Scans

Any phone camera opens complaint form with pre-filled data

QR Label Format

What Happens When Scanned

- ' Asset identified — pole number, road, sector auto-loaded
- ' GPS location — captured automatically
- ' Complaint form — opens in browser (no app needed)
- ' Pre-filled data — citizen only enters name, mobile, issue
- ' Nearby facilities — shows hospitals, police, toilets
- ' Navigation — get directions to any facility

Complete Complaint Lifecycle — End to End

Ø=ÜÊ Status Workflow

+ Rejected, Duplicate, Invalid, Reopened, Escalated

Ø=Ý Real-Time Events (Socket.IO)

- &j New complaint !' Control room instantly notified
- &j Assignment !' Officer gets push notification + SMS
- &j SLA Warning !' Dashboard highlights at 75% time
- &j Resolution !' Control room verifies & closes
- &j Closure SMS !' Citizen receives confirmation

Ø=Ý Key Principle: Every complaint gets a unique number, never disappears, and every action is logged for complete accountability.

Operational Do's & Don'ts

' DO's

- ' Survey every pole before Mela begins — capture GPS + photo
- ' Use weatherproof QR stickers rated for 6+ months outdoor
- ' Apply QR at 5-6 ft height — visible & scannable by public
- ' Test-scan every QR after application — verify data accuracy
- ' Assign complaints within 15 minutes of receipt
- ' Verify resolution photos before closing complaints
- ' Monitor SLA dashboard continuously — act on overdue items
- ' Keep backup power for control room — 24×7 uptime essential
- ' Conduct daily review meeting using MIS reports
- ' Maintain complete audit trail for accountability

'L DON'Ts

- 'L Don't skip GPS tagging — location is critical for navigation
- 'L Don't use paper QR codes — they won't survive weather
- 'L Don't place QR below 3 ft — will be damaged/blocked
- 'L Don't leave complaints unassigned for more than 30 min
- 'L Don't close complaints without verifying resolution photo
- 'L Don't share complainant's personal info publicly
- 'L Don't allow officers to resolve without reaching location
- 'L Don't hardcode business rules — use admin configuration
- 'L Don't delete complaints — maintain complete history
- 'L Don't ignore SLA breach warnings — escalate immediately

WHY US

Why LIVEpro Software Solutions?

10+

Years Exp

50+

Projects

100%

On-Time

24×7

Support

Nagpur-Based Company

Local team = on-site support, quick turnaround, understanding of local needs

Domain Expertise

Experience in government projects, smart city solutions, GIS applications

Full-Stack Capability

Web, mobile, backend, GIS, real-time — all developed under one roof

Mobile-First Approach

Field operations designed for low-connectivity, rugged conditions

End-to-End Ownership

From requirement !' development !' deployment !' training !' support

Proven Technology

Modern, scalable stack used by top enterprises — future-proof investment

Implementation Roadmap — 12 Weeks

Deliverables

- ' Web Application (Admin + Public Portal)
- ' Android App (Play Store ready)
- ' iOS App (App Store ready)
- ' Backend API with documentation
- ' QR printing system + label templates
- ' User training + operation manual
- ' Source code + deployment scripts
- ' 3 months post-launch support
